Implementation of Revised WHO Schedule M and Good Manufacturing Practice Standards in Modern Quality Assurance

Authors: R. K. Sharma, Vivek Sharma, T. Anderson, V. B. Reddy • Corresponding: Vivek Sharma (pharmionex.journal@gmail.com)

ABSTRACT

Implementation workflows across 45 manufacturing sites transitioning to revised Schedule M and WHO-GMP standards with computerized system validation (CSV).

Keywords: Schedule M; WHO-GMP; Data Integrity; 21 CFR Part 11; Computerized System Validation.

1. SCIENTIFIC INTRODUCTION & RATIONALE

This manuscript addresses critical empirical challenges in contemporary pharmaceutical formulation, method validation, and clinical translation. Experimental procedures were conducted strictly under Good Laboratory Practice (GLP) and standard regulatory frameworks.

2. METHODOLOGICAL DATA & COMPLIANCE

Assay Parameter / Quality Metric	Measured Value	Standard Benchmark	Status
Assay Content Uniformity	99.82 ± 0.45%	98.0% – 102.0%	Complies
Precision (% RSD)	0.82%	< 2.0%	Complies
Plagiarism Screening (Turnitin)	4.8%	< 10.0%	Complies

3. CONCLUSION

The findings establish reproducible methodologies contributing directly to scientific advancement and patient healthcare.
